SUMMARY

Data and business analyst with 4+ years of experience across pension, construction software, logistics and public sector environments. Turns messy data and manual processes into clear reporting, reliable data and practical automation using SQL, Power BI, Excel and AI tools. Raised member data completeness by over 40% at Ontario Teachers' Pension Plan and built freight KPI dashboards at CN that helped cut cargo delays by over 10%. Works closely with business and technical teams to gather requirements, support testing and drive adoption.

SKILLS

Technical: SQL, Power BI (Dashboards, Scorecards, DAX, Power Query), Advanced Excel (VBA, Macros, Pivot Tables, Power Pivot, XLOOKUP), Python, Snowflake, Data Validation and Mapping, Machine Learning, AS/400

Platforms: AI Analysis Tools (Microsoft Copilot, Copilot Studio, Internally Developed AI Tools), Power Automate, Microsoft 365 and SharePoint, Jira, Confluence, Microsoft Dynamics 365, Workday, Azure, Visio and Lucidchart

Soft Skills: Requirements Gathering, Process Mapping, UAT and Testing Support, Stakeholder Communication, Root Cause Analysis, Training and Adoption

WORK EXPERIENCE

Pension Data Analyst / Member Data Specialist **Sep 2024 - Jan 2026**

Ontario Teachers' Pension Plan | Toronto, ON

- Helped shape and execute the strategy for a member data completeness initiative, raising completeness by over 40% and hitting a 75% KPI target ahead of schedule.
- Investigated and resolved up to 20 data discrepancy and calculation error cases a day using AS/400 and SQL, working across departments to fix root causes.
- Built and maintained Power BI dashboards and scorecards to monitor data integrity and completeness for business stakeholders.
- Acted as liaison between business and technical teams, gathering requirements and giving regular stakeholder updates through to delivery.
- Built AS/400 macros and helped develop an automated mass letter template builder, cutting manual effort across member communications.

Business Systems Specialist **Sep 2022 - Apr 2024**

Safetyloop Incorporated | Toronto, ON

- Digitized and standardized safety inspection and compliance workflows for construction contractors, replacing manual steps with consistent digital processes.
- Mapped 10+ business processes and produced data flow and interface documentation aligned to operational and regulatory requirements.
- Supported UAT and A/B testing for new features and system upgrades, improving user experience metrics before release.
- Tracked and resolved 50+ data and system issues in Jira, working directly with developers through to production release.

Data Analyst **May 2021 - Aug 2021**

Canadian National Railway (CN) | Toronto, ON

- Extracted and cleaned data from multiple source systems with Power Query and built DAX measures for Power BI dashboards tracking freight KPIs across Canada, helping cut cargo delays by over 10%.
- Produced weekly cargo performance reports and presented findings directly to senior management.
- Supported a Snowflake data pipeline build, contributing to data mapping and validation across multiple source systems.

System Programmer / Analyst **Jan 2021 - Apr 2021**

Toronto Metropolitan University (TMU) | Toronto, ON

- Built an automated email alert system in Google Macros to track 200+ digital certificate expiry dates, removing manual tracking.
- Designed a digital intake form for server and cloud storage requests, cutting processing time by up to 30%.

Data Analyst **Sep 2019 - Jan 2020**

Canada Revenue Agency (CRA) | Scarborough, ON

- Created a workload monitoring dashboard in Excel using VBA, replacing the need for a paid BI tool.
- Queried large provincial datasets daily using SQL to identify trends, anomalies and discrepancies in financial records.
- Worked cross-functionally to gather requirements and deliver structured datasets aligned to stakeholder needs.

EDUCATION

Toronto Metropolitan University Toronto, ON

Bachelor of Commerce (Co-op), Business/Information Technology Management
